# RIO FOUR LEG

---

Design that responds to you.

What goes into an award-winning plastic chair? Patented flexing technology, for one. Add a fresh, modern color palette and an extra-slim, stackable frame and you've got a multipurpose seating solution that allows for more movement, day-long comfort and flexibility than any other chair in its class. Our complete family of Rio models feature our patented Active Rebound Control (ARC) Technology - a performance-minded flexor insert that supports a wide range of motion (20 full degrees to be exact) and responds precisely to the amount of weight pressed against it. The Rio is an easy choice for multi-use spaces that require quick set-ups and breakdowns. Discover a line engineered to allow for better movement, applications across more environments and a longer product life.

- 4-leg, wire rod, 24" counter or 30" bar stool
